Material:	8mm aluminium
Finish:	Standard black powder coating
Glass:	2 x 110mm
Power supply:	220V - 240V / 50 Hz

ACCESSORIES

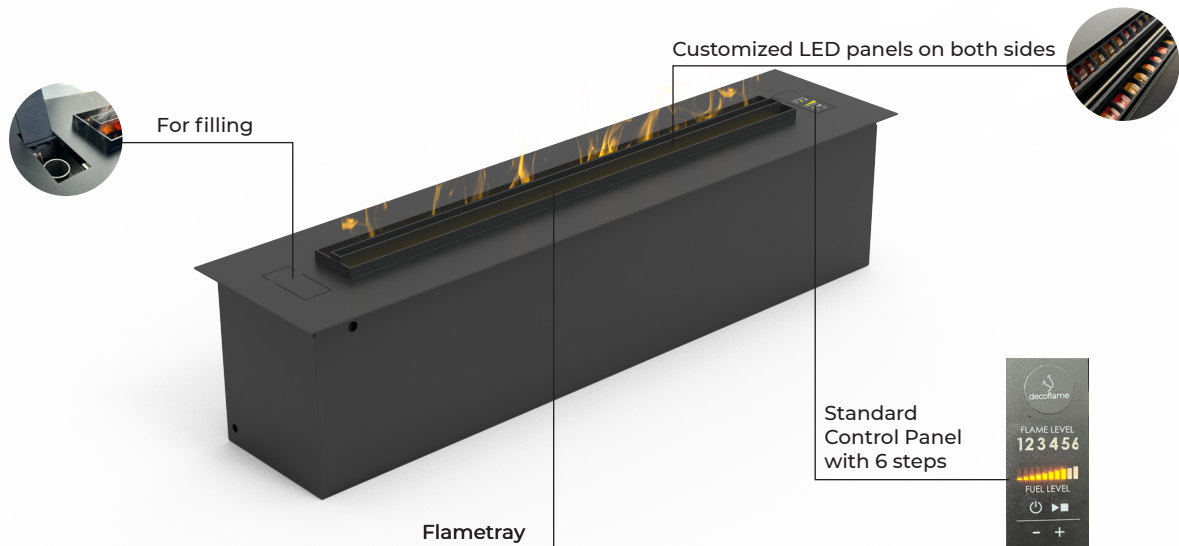

Included in the price:
 - Remote control

AUSTIN

Austin is a freestanding fireplace and simultaneously a minimalist piece of furniture. This model, with its soft and rounded corners, is suitable for rooms or spaces where a stringent design and simple decor are the focus.

It can be used as a room divider or placed against a wall. Additionally, the section beneath the fireplace can be advantageously used for storage or decoration. A beautiful model that also allows you to add your personal touch, for instance, if you have a company and wish to have its logo cut out in the plate on the lower section.

For information about the Hybrid Mist Burner, see page 2.

Demineralized Water

Only demineralized water may be used to avoid lime, salts, and minerals that can affect the function of the fireplace.

Remote control included

With Decoflame's remote control, operating the electronic fireplace is simplified - it's intuitive for a great user experience.

App Control for IOS and Android

Decoflame's app allows you to adjust flames, monitor fuel levels, use the time-off function for automatic shutdown, and control multiple fireplaces, increasing both convenience and safety.

	720mm
Size	720x215x215
Flametray size	500mm
Capacity	6L
Fuel consumption	125 ml/h
Burning time	> 48 h
Net weight	14,5 kg

Produced in	Denmark
Flame levels	6 flamelevels
Sensors	Water Level Indicator / Flame Level Indicator
Powersupply	230 V
Fuel Type	Demineralized water ONLY
Flue	Not required
No internal pump	No noise, reduced maintenance, increased reliability
Finish top-plate	2mm black powder-coated steel
Application	Indoor use only

The Hybrid Mist Fireplace has been developed with a technology that atomizes the water vapor. The mist can then be controlled electronically and combined with special built-in LED lights in different colours which give the illusion of real flames.

For those who are not much for open fire in the home when there are small children or pets around, this is a great alternative.
